

# Say Goodbye To Your Messy Playground

## 10 Reasons to Improve your Existing Rubber Mulch Playground:

- 1 A rubber mulch play surface must be visually inspected and raked smooth daily to be compliant with ADA accessibility regulations, IPEMA certification, and ASTM F1951 standards.
- 2 The rubber mulch pieces get everywhere: classrooms, pockets, cars, washing machines, etc.
- 3 Things hide in rubber mulch. Sometimes disgusting dirty things.
- 4 Young kids may even put it in their mouth. This can be harmful to a child's health as it is unsanitary and a choking hazard.
- 5 Rubber mulch is dirty. Kids and clothes are tainted in black after play.
- 6 It's not as soft as you may think. Rubber mulch is abrasive to kids' hands, feet, knees, and elbows.
- 7 It always seems to disappear. You must continually add more, topping it off every year or two.
- 8 It's not comfortable for kids to sit or play on, and doesn't encourage tumbling or sitting and socializing with friends.
- 9 If you want to get rid of the rubber mulch play surface, you will pay a large disposal fee to make it go away.
- 10 Installing Playground Grass™ turf over an existing rubber mulch playground solves all of these problems, and looks amazing! (See back for details.)

### How it works:

ForeverLawn® utilizes the rubber mulch that is currently in place on the playground and rakes it smooth to ensure a minimum depth of six inches. We then install our interlocking one-inch SafetyFoam Pro™ panels over the entire surface area. Lastly, we install beautiful, soft, long-lasting turf designed specifically for a playground surface.

### Why this is smart:

- Your rubber mulch investment is utilized so you don't have to pay the significant expense required to send it to a landfill.
- Playground Grass installations can be scheduled and installed quickly with minimal disruption to your facilities.

### Benefits of Playground Grass:

- Consistent, predictable, and reliable safety performance over the entire surface.
- Our Playground Grass™ safety system with rubber mulch offers a 15-foot critical fall height rating, the highest rating for any unitary play surface.
- ForeverLawn Playground Grass and SafetyFoam Pro™ are backed by a 10-year warranty.
- The system is ADA compliant, IPEMA certified, and meets the ASTM F1292 specification for impact attenuation as well as the ASTM F1951 surface accessibility standard.
- ForeverLawn also monitors and meets all CPSC standards and recommendations for playground surfaces.
- Once you see kids playing on a synthetic turf surface you will understand why it's the fastest growing play surface in the United States.
